

APPLETON™ LIGHTING POLES, MOUNTING BRACKETS AND ACCESSORIES

For United States Destinations Only

Applications

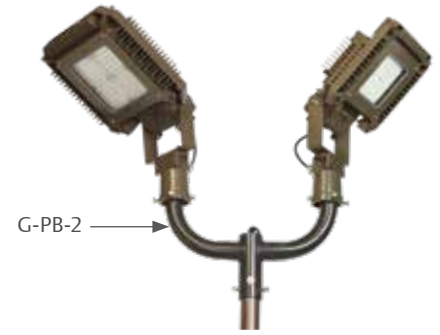

- These lighting poles, mounting brackets, and accessories are used to mount single or multiple luminaires at heights ranging from 14 feet to 39 feet.
- Lighting pole types include hinged steel poles, square steel poles, square tapered steel poles, and round tapered steel poles.

Streamlined Ordering Process

- All lighting poles have been standardized, and pricing can be found on Members Only. For a lighting pole catalog item to be added to an SPA, please contact Pricing.AppletonGroup@Emerson.com.
- Discount code: **APPLBK**

Stocking Program

- Multiple lighting brackets and accessories are stocked items, and have an average lead time of two days.
- Stocked brackets: G-PB-2, G-PB-2-GAL, G-PB-3-GAL, G-PB-4-GAL, G-PWB-1, G-PSWB6-GAL

*Areamaster™ Generation 2 LED with
G-PB-2 Mounting Bracket*

Standard Lighting Pole Features and Components — All Hardware for Pole Assembly is Provided

Features	Description
	Tenon pole top All poles come standard with a 2-3/8" pipe size tenon top, which accepts a single luminaire; or two, three, or four luminaires with appropriate pole-top mounting bracket.
	Handhole and cover A 3"x5" reinforced handhole with cover and grounding lug above pole base is standard on all poles. Handhole covers are supplied with a waterproofing gasket.
	Base plate cover A full base plate cover, made of automotive structural grade steel, comes standard with all poles. The base plate cover is rust proof and tamper resistant.
	Anchor bolts Anchor bolts are furnished complete with nuts and washers, conform to ASTM F1554 Gr. 55, and are galvanized. All anchor bolts will be pre-shipped ahead of lighting pole(s).
	Finish All poles come standard with a dark bronze powder coat finish, (as is used on the pictured AMLED67) unless the "-GAL" suffix is used to indicate a galvanized finish.
	Base plate Base plate sizes range from 8" to 13" square, made of structural quality steel with a minimum yield strength of 86,000 psi. All base plate templates (and anchor bolts) will be pre-shipped ahead of the lighting pole(s).
